

**Prince George's County's  
Automated Speed Enforcement  
CAC Briefing  
January 10, 2013**

**Accomplishments of Program**

The Prince George's County Automated Speed Enforcement Program has been created to save lives. Prince George's County has led the State of Maryland for several years in fatal motor vehicle accidents.

\*Preliminary Data

In 2012, the Prince George's County Police Department has investigated 55 vehicle accidents resulting in 57 fatalities (Prince George's County Police investigations on County Roads). In comparison, we have had 64 homicides this year in the County. An average, law abiding citizen has nearly the same chance of being killed on our roads as by felonious assault.

Beginning in September of 2011, Prince George's County began deploying portable automated speed enforcement cameras. After a 30 day warning period beginning with the first camera, cameras were deployed by approximately six per month until reaching 72 cameras. These cameras have been rotated through 143 locations (camera placements). These camera locations include 132 school zones and 11 Institution of Higher Education Zones. Some cameras have been redeployed back to the same locations based on community requests. In the first 16 months of the program, we have issued 557,640 violations. This includes 118,305 in 2011 and 439,335 in 2012. There has been a 45% decrease in speeding violations from our highest violation month, June of 2012, to September 2012 (50,696 to 27,982), as motorists are changing their driving behavior and slowing down.

The Prince George's County Police Department studied the before and after effects of the Automated Speed Program for compliance with speed limits on 7 major roadways where automated speed cameras were installed. We have found up to a 72% increase in compliance with the posted speed limit (Woodyard Road {MD Route 223} at James Madison Middle School - Northbound), with an average increase in compliance on these roads of 47%.
