

**Wonderfully Entertaining and Informative Slideshow and Discussion!**

# **Greenbelt's Fifth Annual Global Warming Science Update with Dr. Chris Barnet**

**Wed., November 11, 7:00 pm**

**Greenbelt CommunityCenter, Room 114**

**15 Crescent Road. Greenbelt, MD**

Dr. Barnet who is a climate change scientist from Greenbelt will review the latest scientific findings and conclusions concerning climate change and will present his up-to-date always popular slide show to make his points, while incorporating his usual unique brand of humor. He will then lead what usually turns into a lively and contentious discussion on climate change and sustainable energy.

Dr. Barnet would like to spend most of the evening answering your questions about the latest concerns you have about climate change. At a recent talk students at Catholic University asked him the following questions.

- **How long would it take to see improvement if we change things immediately?**
- **How do we, the public, know what the truth really is when we are consistently bombarded by different facts and opinions?**
- **Are there any technologies for absorbing the carbon dioxide in the atmosphere?**
- **How can we make our government aware that the problem needs to be treated right away?**
- **Why is it that countries even less developed than the USA are more actively involved in combating global warming?**

**Come Prepared with *your* toughest most pertinent questions!**

If you would like to get involved locally working on the political front to help fight global warming, come to hear Susan Stewart, a volunteer with the Chesapeake Climate Action Network, talk about how you can help and also hear her talk about the latest news concerning proposed government action.

GCAN meets the second Wednesday of every month at 7:00 pm in the Community Center. Next meeting is December 9. For more information, please contact Steve Kane at 301-441-3809 or email [srkane@gmail.com](mailto:srkane@gmail.com).
